# CFS BIG'UN 300 ABF

Code 3504

Feed **CFS Big'Un 300** in conjunction with water and a minimum of 1% body weight (on a dry matter basis) of a long stemmed forage (hay/pasture). Feed according to the following table. The lower quantity meets minimum vitamin and mineral requirements and the higher quantity meets superior recommendations. Ideally, feed enough **CFS Big'Un 300** to achieve desired body condition. For every kilogram under the superior recommendation, provide 200 grams of **CFS Select** (3571). See tag for more details.

## GUARANTEED ANALYSIS

|                              |        |              |
|------------------------------|--------|--------------|
| <b>Crude Protein</b>         | Min.   | 16.00%       |
| <b>Crude Fat</b>             | Min.   | 4.00%        |
| <b>Crude Fibre</b>           | Max.   | 15.00%       |
| <b>Sodium</b>                | Actual | 0.45%        |
| <b>Calcium</b>               | Actual | 1.10%        |
| <b>Phosphorus</b>            | Actual | 0.65%        |
| <b>Vitamin A</b>             | Min.   | 11,916 IU/kg |
| <b>Vitamin D<sub>3</sub></b> | Min.   | 2,200 IU/kg  |
| <b>Vitamin E</b>             | Min.   | 220 IU/kg    |
| <b>Selenium</b>              | Added  | .40 mg/kg    |

## CALORIE METER

| ACTIVITY LEVEL    | Kg / 100 kg of Body Weight |          |
|-------------------|----------------------------|----------|
|                   | Minimum                    | Superior |
| <b>Broodmares</b> |                            |          |
| Gestating Mare    | 0.73                       | 1.00     |
| Lactating Mare    | 0.91                       | 1.25     |
| <b>Foals</b>      |                            |          |
| 4 – 6 Months      | 1.00                       | 1.25     |
| 7 – 24 Months     | 0.91                       | 1.25     |

## OPTIMIZE YOUR HORSE'S DIET

Clarence Farm Services Ltd. recommends analyzing your hay and balancing the ration accordingly.

Feed clean and dust free hay in sufficient amount daily. Feeding poor quality hay or feeding inadequate amounts could cause colic and other digestive upsets.

Offer source of salt (NaCl) daily as well as plenty of fresh and clean water at all times.

Make any feed change gradually over a 7 to 10 days period.

Daily ration should be divided into 2 and preferably 3 separate feedings or more.

Use a scale to weigh your feed, so you know exactly how much your horse is being fed. Do not feed by volume.

Clarence Farm Services Ltd recommends providing a maximum of 0.5% of body weight of this feed at one time.

Follow sound management practices along with optimal preventive veterinary medicine.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. If necessary, consult your Purina Dealer or Purina Certified Equine Consultant.
