CFS STABLE EDGE ABF

Code 3600

Feed **CFS Stable Edge** horse feed in conjunction with at least 1% of body weight (on a dry matter basis) of a long-stemmed forage (hay/pasture). Feed **CFS Stable Edge** according to the following table. The lower quantity meets minimum vitamin and mineral requirements and the higher quantity meets suggested recommendations. Ideally, feed enough to achieve desired body condition. For every kilogram under the recommended level provide 200 grams of **CFS Elevate** (3573). Depending on hay analysis and/or horse's age, **CFS Select** (3571) may be better suited as the ideal top-dress supplement.

GUARANTEED ANALYSIS

Crude Protein	Min.	13.00%
Crude Fat	Min.	2.50%

Vitamin D ₃	Min.	1200 IU/kg
Vitamin E	Min.	150 IU/kg
Selenium	Added	0.20 mg/kg

ACTIVITY LEVEL	kg / 100 kg of Body Weight	
	Minimum	Recommended
Maintenance	0.67	.76

OPTIMIZE YOUR HORSE'S DIET

Clarence Farm Services Ltd. recommends analyzing your hay and balancing the ration accordingly.

Feed clean and dust free hay in sufficient amount daily.

Feeding poor quality hay or feeding inadequate amounts could cause colic and other digestive upsets.

Offer source of salt (NaCl) daily as well as plenty of fresh and clean water at all times.

Make any feed change gradually over a 7 to 10 days period.

Daily ration should be divided into 2 and preferably 3 separate feedings or more.

Use a scale to weigh your feed, so you know exactly how much your horse is being fed. Do not feed by volume.

Clarence Farm Services Ltd. recommends providing a maximum of 0.5% of body weight of this feed at one time.

These recommendations are intended as a guide. They should be adjusted to variables of management,

environment and individual needs. Follow sound management practices along with optimal preventive

veterinary medicine. If necessary, consult your Purina

Dealer or Purina Certified Equine Consultant. pam@cfs.ca
