

CFS Pro Horse 300 ABF

Code 3530

Make sure your mare and foal receive all the nutrition they need!

CFS Pro Horse 300 is a quality coarse feed with enhanced fortification to meet the requirements of stallions, late gestating, lactating mares, suckling foals and weanlings. It's digestible, palatable, versatile and easy to use.

FEATURES	BENEFITS
A complete and balanced feed for late gestation and lactating mares	Provides mares with quality nutrition to improve milk production and maintain body condition
A balanced feed well fortified for suckling foals and weanlings	Provides nutrients required for healthy growth and development
Excellent creep feed	Satisfies the increasing nutrient requirements of nursing foals as they grow
Coarse/sweet feed with quality flaked grains	Increases digestibility of starch Minimizes dust
Contains balanced amino acids	Provides protein building blocks for improved muscle development
Contains organic Selenium	Higher bioavailability and optimal absorption
Convenient and versatile	Mares and foals are fed the same feed
Palatable	Increases feed intake
Manufactured in a HACCP approved facility with high standards of biosecurity and quality	Consistent quality feed Showing our commitment to feed safety and customer satisfaction
CFS horse feeds and supplements are animal by-product free (ABF)	Peace of mind
Available at a competitive price	Excellent value
High quality feed manufactured in Atlantic Canada	Minimizes transport cost Optimizes freshness

ACTIVITY LEVEL	Kg / 100 kg of Body Weight	
	Minimum	Superior
Broodmares		
Gestating Mare	0.73	1.00
Lactating Mare	0.91	1.25
Foals		
4 – 6 Months	1.00	1.25
7 – 24 Months	0.91	1.25

OPTIMIZE YOUR HORSE'S DIET

Clarence Farm Services Ltd. recommends analyzing your hay and balancing the ration accordingly.

Feed clean and dust free hay in sufficient amount daily. Feeding poor quality hay or feeding inadequate amounts could cause colic and other digestive upsets.

Offer source of salt (NaCl) daily as well as plenty of fresh and clean water at all times.

Make any feed change gradually over a 7 to 10 days period.

Daily ration should be divided into 2 and preferably 3 separate feedings or more.

Use a scale to weigh your feed, so you know exactly how much your horse is being fed. Do not feed by volume.

Clarence Farm Services Ltd. recommends providing a maximum of 0.5% of body weight of this feed at one time.

Follow sound management practices along with optimal preventive veterinary medicine.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. If necessary, consult your Purina Dealer or Purina Certified Equine

Consultant. 902-890-5343
