

CFS Select ABF

Code 3571

Vitamin & mineral balance. 100% nutrition

CFS Select is designed to provide the correct balance of essential vitamins and minerals to horses not receiving the recommended amount of a Purina or CFS fortified feed. Unique, palatable and providing an ideal amino acids profile. **CFS Select** is ideal for lactating mares and foals, ensuring a controlled and uniform growth rate, which helps to prevent Developmental Orthopedic Diseases(DOD). **CFS Select** increases the total nutrient content of the ration without significantly increasing the level of calories. Exercised horses will benefit from **CFS Select**, and those using **CFS Select** as a supplement with poor quality hay. **CFS Select** contains Purina yeast culture, and organic selenium, zinc, manganese and copper.

FEATURES	BENEFITS
Unique formulation with a high nutrient to calorie ratio	Increases the total nutrient density of the daily ration without significantly increasing caloric (energy) content. Satisfies the increasing requirements of nursing foals as they grow Supplements the level of protein, vitamins, and minerals for CFS Select bone and muscle development
Contains dried brewers yeast	Amino acid composition equivalent to whey without the lactose Rich source of B-vitamins and numerous other nutrients
Contains strictly vegetable protein sources	Safe and high quality vegetable protein providing the proper amino acid balance
Supplemented lysine and methionine	Provides correct balance of amino acids (protein building blocks) for improved development
Contains added vegetable oil	Provides essential fatty acids for hair coat and overall health
Contains a full compliment of vitamins including biotin, B-vitamins and Vitamin C	Supports optimum metabolic efficiency Promotes health and vitality Promotes healthy hooves
Contains chelated copper, zinc, manganese and selenium	Increases absorption and enhances trace mineral bio-availability for heightened immune response, improved reproductive function and fewer problems associated with DOD in growing horses
Manufactured in a HACCP approved facility with high standards of biosecurity and quality	Consistent quality feed Showing our commitment to feed safety and customer satisfaction
CFS Horse feeds and supplements are animal by-product free (ABF)	Peace of mind
High quality feed manufactured in Atlantic Canada	Minimizes transport cost Optimizes freshness

OPTIMIZE YOUR HORSE'S DIET

Clarence Farm Services Ltd. recommends analyzing your hay and balancing the ration accordingly.

Feed clean and dust free hay in sufficient amount daily. Feeding poor quality hay or feeding inadequate amounts could cause colic and other digestive upsets.

Offer source of salt (NaCl) daily as well as plenty of fresh and clean water at all times.

Make any feed change gradually over a 7 to 10 days period.

Daily ration should be divided into 2 and preferably 3 separate feedings or more. Use a scale to weigh your feed, so you know exactly how much your horse is being fed. Do not feed by volume.

Clarence Farm Services Ltd. recommends providing a maximum of 0.5% of body weight of this feed at one time.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. Follow sound management practices along with CFS Select preventive veterinary medicine. If necessary, consult your Purina Dealer or Purina Certified Equine Consultant. 902-890-5354
