Multi-Attributes	
Flavour/Binder	

* Ingredients are not in order of their inclusion rate.

- Purina recommends analyzing your hay and balancing the ration accordingly.
- Feed clean and dust free hay in sufficient amount daily. Feeding poor quality hay or feeding inadequate amounts could cause colic and other digestive upsets.
- Offer source of salt (NaCl) daily as well as plenty of fresh and clean water at all times.
- Make any feed change gradually over a 7 to 10 days period.
- Daily ration should be divided into 2 and pre-ferably 3 separate feedings or more.
- Use a scale to weigh your feed so you know exactly how much your horse is being fed. Do not feed by volume.
- These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. Consult your Purina Equine Consultant if necessary.
- Follow sound management practices along with optimal preventive veterinary medicine.

Caution

Directions for use must be carefully followed.

Feed is perishable. Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, abortion or death.
