RABBIT CHOW PERFORMANCE BLEND ABF

Code

5301

Feed Purina Rabbit Chow Performance Blend ABF according to the following directions:

Growth & Reproduction-Lactating Does /Bunnies – Feed free choice to lactating doe and her litter. Feed bunnies free choice after weaning until market weight. Does alone should consume 115-175 g per day. The doe and litter will consume considerably more as bunnies mature and grow.

Weaning/Gestating Does- When litter is weaned from doe, feed only 30-60 g for a single day to quickly reduce milk production. Gestating does can be limit fed at 115-145 g per day to maintain ideal body condition.

Maintenance-Dry Does, Bucks, Pets- Rabbits should maintain ideal body condition by consuming 85-140 g per day. Adjust feeding rate to maintain desired body weight.

Show Rabbits- Limit feed and adjust feeding rate for desired body condition.

Breeding- Eight Cycle Breeding Program (45 Days):The breeding program below is designed for use only with this product and will support eight breeding cycles annually to help maximize the reproductive potential of does and growth in bunnies.

OPTIMIZE YOUR RABBIT'S DIET

Clarence Farm Services Ltd. recommends you follow these management practices:

Offer high quality roughage.

Provide a source of clean, fresh water to bunnies and rabbits at all times.

Do not allow fine material to accumulate in feeders. Consult your veterinarian for recommended health programs for your local area.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. If necessary, consult your local Purina Dealer or Clarence Farm Services Ltd. Farm Consultant.
