## OPTIMIZE YOUR POULTRY RATION

Clarence Farm Services Ltd. recommends you follow these management practices:

1. Provide a source of clean, fresh water at all times.
2. Chicks should be fed on a free choice basis. After 5 weeks of age, double the feeder space and water capacity.
3. Broilers are usually processed at 2 kg (4.4 lbs.) while roasters can be processed at 3.5 kg (8 lbs). Pullets are usually smaller and lighter than cockerels of the same age.
4. Any ration changes should be made gradually.
5. Consult your veterinarian for recommended flock health program.
6. Directions for use must be followed carefully.
7. Do not feed this feed in association with another grain ration, supplement or premix containing selenium
8. Feed is perishable. Store in a dry, well ventilated area protected from rodents and insects. Do not feed mouldy or insect-infested feed to animals or it may cause illness, abortion, or death.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. If necessary, consult your local Purina Dealer or Clarence Farm Services Ltd. Farm Consultant.

## GUARANTEED ANALYSIS

|                        |        |             |
