

CFS HAY COMP ABF supplement

Code 3320

CFS HAY COMP is a pelleted high quality fibre compensator designed to supplement part of your daily hay ration

CFS Hay Comp is a **non fortified**, pelleted hay compensator with high quality fibre designed for all horses over the age of 6 months, including senior horses. **CFS Hay Comp** can replace a portion of the daily hay ration up to 40% of the roughage in the diet.

FEATURES	BENEFITS
25% crude fibre content from high quality roughage sources.	Can substitute up to 40% of daily hay ration to limit the feeding of poor quality hay or pasture
Allows decrease in amount of hay or pasture consumed	Control the volume of hay intake to prevent “hay bellies” More consistent than hay
Pelleted form	A dust-free hay supplement, which is excellent for older horses or horses with respiratory conditions Prevents sorting for more consistent nutrition
Easy to carry	Ideal hay companion for the traveling horse
Moderate energy level (calories)	A nice hay compliment for easy keepers if fed with a ration balancer: i.e. CFS Elevate or CFS Select
Minimal amount of starch	Keeps horses from becoming too “hot” Low sugar levels
Guaranteed analysis	Fibre source with consistent energy and protein levels
Can safely be fed to senior horses	Easily digested by the “aged” horse Should be fed soaked for older horses, horses prone to dehydration, or horses that have experienced choke
Versatile hay companion	Compliments nutritional programs on our feeds and supplements very well
Manufactured in a HACCP approved facility with high standards of bio-security and quality	Consistent quality feed and supplements Showing our commitment to feed safety and customer satisfaction
CFS horse feeds, supplements and hay replacer are animal by-product free (ABF)	Peace of mind
Available at a competitive price	Excellent value
Quality horse hay supplement manufactured in Atlantic Canada	Minimizes transportation costs Optimizes freshness

CFS HAY COMP ABF supplement

Code 3320

CFS Hay Comp is a roughage compensator that can be fed to all horses 6 months of age and older. A horse should consume a minimum of 1.5 to 3% body weight per day of long stemmed forage (hay/pasture). **CFS Hay Comp** can replace up to 40% of the forage normally fed to an individual horse. A typical **Hay Comp** feeding rate is 0.5 to 1.35% body weight per day. For example, a 500 kg. horse receiving a minimum of 1.5% body weight (or 7.5 kg) in forage, can receive up to 40% of the 7.5 kg per day (or 3 kg) of **CFS Hay Comp**. The daily ration should be fed over a recommended 2 to 3 separate feedings. This high fibre product does not contain added vitamins or minerals, and should be fed along with a Purina complete feed and/or CFS Elevate (3573) or CFS Select (3571). Feed **CFS Hay Comp** in conjunction with free choice water and a minimum of 1% body weight (on a dry matter basis) of a long stemmed forage (hay/pasture). Feed according to the following table. Provide free choice salt. We recommend feeding as a wet mash, but depending on your feed rate it is not mandatory.

CALORIE METER

GUARANTEED ANALYSIS

Crude Protein	Min.	13.00%
Crude Fat	Min.	3.00%
Crude Fibre	Max.	25.00%

Activity Level	Kg / 100 Kg of Body Weight	
	Minimum	Superior
Maintenance	0.50	1.00
Senior	0.50	1.00
Foals 6-24 months	0.50	1.00

OPTIMIZE YOUR HORSE'S DIET

Clarence Farm Services Ltd. recommends analyzing your hay and balancing the ration accordingly.

Feed clean, dust free hay in sufficient amount daily along with **CFS Hay Comp**. Feeding poor quality hay or feeding inadequate amounts could cause colic and other digestive upsets.

Offer source of salt (NaCl) daily as well as plenty of fresh and clean water at all times.

Make any feed or ration change gradually over a 7 to 10 days period.

Daily ration should be divided into 2 and preferably 3 separate feedings or more. **CFS Hay Comp** is best fed in small feedings often.

Use a scale to weigh your feed, hay and hay extender, so you know exactly how much your horse is being fed. Do not feed by volume.

Clarence Farm Services Ltd. recommends providing a maximum of 0.5% of body weight in feed and **CFS Hay Comp** at one time. These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. Follow sound management practices along with optimal preventive veterinary medicine. If necessary, consult your CFS Dealer or Purina Certified Equine Consultant.
