# CFS BIG'UN 300

Make sure your mare and foal receive all the nutrition they need! s pelleted controlled sugar maternity feed. **CES Big'Un 300** has

**CFS Big'Un 300** is pelleted controlled sugar maternity feed. **CFS Big'Un 300** has enhanced fortification to meet the nutrient requirements of stallions, late gestating mares, lactating mares, suckling foals, and weanlings. **CFS Big'Un 300** is versatile and easy to use.

| FEATURES   | BENEFITS   |
|--|--|
| A complete and balanced feed for late gestating and lactating mares                      | Provides mares with quality nutrition to improve milk production and maintain body condition |
| A balanced controlled sugar feed for suckling foals and weanlings                        | Provides nutrients required for healthy growth and development                               |
| Excellent creep feed   | Satisfies the increasing nutrient requirements of nursing foals as they grow                 |
| Pelleted texture   | Increases digestibility of starch<br>Prevents sorting for a more consistent feed intake      |
| Contains balanced amino acids  | Provides protein building blocks for improved muscle development                             |
| Contains organic Selenium  | Higher bioavailability and optimal absorption  |
| Convenient and versatile   | Mares and foals are fed the same feed  |
| Palatable feed   | Increases feed intake  |
| Manufactured in a HACCP approved facility with high standards of biosecurity and quality | Consistent quality feed<br>Showing our commitment to feed safety and quality                 |
| CFS horse feeds and supplements are animal by-product free (ABF)                         | Peace of mind  |
| Available at a competitive price   | Excellent value  |
| High quality feed manufactured in Atlantic<br>Canada                                     | Minimizes transport cost<br>Excellent value<br>Optimizes freshness                           |

## CFS BIG'UN 300

Feed **CFS Big'Un 300** in conjunction with water and a minimum of 1% body weight (on a dry matter basis) of a long stemmed forage (hay/pasture). Feed according to the following table. The lower quantity meets minimum vitamin and mineral requirements and the higher quantity meets superior recommendations. Ideally, feed enough **CFS Big'Un 300** to achieve desired body condition. For every kilogram under the superior recommendation, provide 200 grams of **CFS Select** (3571). See tag for more details.

|                | Kg / 100 kg of Body Weight |          |
|----------------|----------------------------|----------|
| ACTIVITY LEVEL | Minimum                    | Superior |
| Broodmares     |                            |          |
| Gestating Mare | 0.73                       | 1.00     |
| Lactating Mare | 0.91                       | 1.25     |

#### **OPTIMIZE YOUR HORSE'S DIET**

Clarence Farm Services Ltd. recommends analyzing your hay and balancing the ration accordingly.

Feed clean and dust free hay in sufficient amount daily. Feeding poor quality hay or feeding inadequate amounts could cause colic and other digestive upsets.

Offer source of salt (NaCl) daily as well as plenty of fresh and clean water at all times.

Make any feed change gradually over a 7 to 10 days period.

Daily ration should be divided into 2 and preferably 3 separate feedings or more.

Use a scale to weigh your feed, so you know exactly how much your horse is being fed. Do not feed by volume.

Clarence Farm Services Ltd recommends providing a maximum of 0.5% of body weight of this feed at one time.

Follow sound management practices along with optimal preventive veterinary medicine.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. If

necessary, consult your Purina Dealer or Purina Certified Equine Specialist 902-890-5354. **25 kg bags**
