# DEC-FASTART CALF STARTENA 20

Code 1034

Feed Purina **DEC-FASTART CALF STARTENA** coarse as the sole ration on a free choice basis during the first two months after birth. No hay should be offered during this period. Calves should be encouraged to consume **DEC-FASTART CALF STARTENA** during week one by offering small amounts to calves immediately. At three month of age feed **DEC-FASTART CALF STARTENA** on a free choice basis, approximate daily consumption is 2 to 3 kg and good quality hay. Feed **DEC-FASTART CALF STARTENA** at 3 kg/per calf/day in the fourth month. Followed by 2-2.5 kg Purina Heifer Max 21% or Bovastretch 18% or Calf Grower 16% until six months of age.

## WARNING:

No withdrawal period is required when this medicated feed is fed at recommended rate of 0.5 mg Decoquinatate per kg body weight per day.

Do not feed to lactating dairy cattle producing milk for human consumption

Do not feed to sheep due to possible copper toxicity.

Vitamin A	Min.	25,000 IU/kg
Vitamin D <sub>3</sub>	Min.	6,750 IU/kg
Vitamin E	Min.	85 IU/kg
Selenium	Added	0.30 mg/kg

## OPTIMIZE YOUR CALF'S RATION

Clarence Farm Services Ltd. recommends you follow these management practices:

1. Provide a source of clean, fresh water at all times.
2. To ensure freshness, offer only the amount of feed that calves will consume in one day.
3. Clean feed pails daily.
4. Proper housing and sanitation are important to help prevent calf diarrhea and pneumonia. Consult your veterinarian for recommended herd health program.
5. When calves are housed in groups after weaning, provide adequate feeding space to assure that all calves can eat at the same time.
6. Do not use this medicated feed for treatment of outbreaks of Coccidiosis.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. If necessary, consult your Purina Dealer or Clarence Farm Services Ltd. Farm Consultant.
