	Code 1677 Actual 1.0%
	Code 1678 Actual 1.15%
Phosphorus	Actual 0.52%
Vitamin A	Min. 15,000 IU/kg
Vitamin D ₃	Min. 2,555 IU/kg
Vitamin E	Min. 50 IU/kg
Selenium	Added 0.40 mg/kg

OPTIMIZE YOUR DAIRY RATION

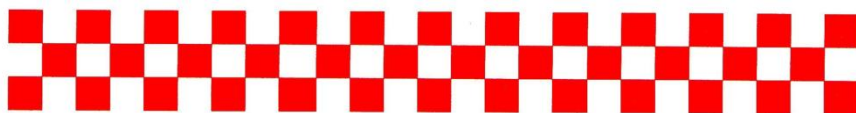

Clarence Farm Services Ltd. recommends you follow these management practices;

1. Provide a source of clean, fresh water at all times.
2. For most forage programs, provide the appropriate Purina dairy mineral free-choice. Minerals should be provided in sheltered feeders.
3. When changing forages or milking rations, the change should be made gradually by mixing the new ration with the old ration for a period of one week.
4. Consult your veterinarian for recommended herd health program.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. If necessary, consult your Purina Dealer or Clarence Farm Services Ltd. Farm Consultant.
