CFS Hay Comp

3320

CFS Hay Comp is a forage compensator that can be fed to all horses 6 months of age and older. A horse should consume a minimum of 1.5 to 3% body weight per day of long-stemmed forage (hay/pasture). **CFS Hay Comp** can replace up to 40% of the forage normally fed to an individual horse. A typical **Hay Comp** feeding rate is 0.5 to 1.35% body weight per day. For example, a 500 kg. horse receiving a minimum of 1.5% body weight (or 7.5 kg) in forage, can receive up to 40% of the 7.5 kg per day (or 3 kg) of **CFS Hay Comp**. The daily ration should be fed over a recommended 2 to 3 separate feedings. This high fibre product does not contain added vitamins or minerals and should be fed along with a Purina complete feed and/or CFS Elevate (3573) or CFS Select (3571).

Feed **CFS Hay Comp** in conjunction with free choice water and a minimum of 1% body weight (on a dry matter basis) of a long-stemmed forage (hay/pasture). Feed according to the following table. Provide free choice salt. We recommend feeding as a wet mash, but depending on your feed rate it is not mandatory.

Activity Level	Minimum kg/100/ of body weight /day	Superior kg/100/ of body weight /day
Maintenance	0.50 kg	1.00 kg
Senior	0.50 kg	1.00 kg
Foals 6-24 Months	1.00 kg	1.00 kg

Nutrients	Ingredients Representative ingredients only; not a complete list or in order of inclusion.
Fibre	Soya Hulls
Protein / Amino Acids	
Starch	Ground Barley
Fat	Critical Soy Oil
Vitamins	
Minerals	
Multi-Attributes	Wheat Shorts
Flavor / Binder	

KEY FEATURES

40%

Can Replace up to 40% Of daily forage requirements

25% crude fibre content from high quality roughage sources. Control the volume of hay intake to prevent "hay bellies"

Minimal amount of starch/ Low NSC

Keeps horses from becoming too "hot"
Good for horses requiring lower NSC deit

Can safely be fed to senior horses

Easily digested by the "aged" horse
Should be fed soaked for older horses

OPTIMIZE YOUR HORSE'S DIET

Clarence Farm Services Ltd. recommends analyzing your hay and balancing the ration accordingly.

Feed clean, dust free hay in sufficient amount daily. Feeding poor quality hay or feeding inadequate amounts could cause colic and other digestive upsets.

Offer source of salt (NaCl) daily as well as plenty of fresh and clean water at all times.

Make any feed change gradually over a 7 to 10 days period.

Daily ration should be divided into 2 and preferably 3 separate feedings or more.

Use a scale to weigh your feed, so you know exactly how much your horse is being fed. Do not feed by volume.

Clarence Farm Services Ltd. recommends providing a maximum of 0.5% of body weight of this feed at one time.

These recommendations are intended as a guide. They should be adjusted to variables of management, environment and individual needs. Follow sound management practices along with optimal preventive veterinary medicine. If necessary, consult your Purina Dealer or CFS Equine Consultant 902-890-5354 or equine@cfs.ca
